● For milk houses, pig pens, storage houses—for any building job—concrete blocks are indispensable!

The **GI** Concrete Block Maker solves the problem of getting blocks quickly, economically and in exact quantities. There's no waste of blocks—no shortage. When extra blocks are needed, they can be turned out in a matter of minutes.

When extra pallets are used, rugged, sturdy **GI** Block Maker can average 250 blocks a day! Standard 8" x 8" x 16" —3 core size.

All steel constructed... precision engineered... handsome, durable gray enamel finished. The **GI** Concrete Block Maker is built for years of efficient, profitable service!

EXTRA PALLETS

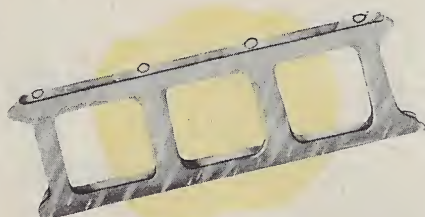

FOR INDIVIDUAL REQUIREMENTS

Extra pallets speed up production! There's no waiting for one block to dry before the other is started. Assures continuous output.

Each pallet well made of long-lasting aluminum.

CATALOG NO. MG-6603

Weight approximately one pound each

The simplicity of the **GI** Concrete Block Maker makes the job as easy as A—B—C.

A—Place the sturdy aluminum pallet in mold. Slide Hopper in position.

B—Pour in concrete. Slide back Hopper. Tamp and edge block.

C—Raise and remove block from mold. After sufficient drying time, remove pallet.

Portable, lightweight, the **GI** Block Maker can easily be moved to neighboring farms for additional, profitable custom work. Pays for itself in no time at all and keeps bringing in extra dollars.
